The yields that decrease are especially difficult in mana won this race. Let's say you win e120 mana without comboing and e135 with comboing, you increase your XP by...12.5%. Of course it's great and you should eat once. But if you come back to combo and go from e135 to e137, you'll increase it... less than 2%. (+The XP won to buy additional sources, but it's usually not that much) What does that mean? Don't bother to win mana. Like I said, I eat once. Go back to the time of the combo a little later on in the race if you really want it, but most of the time should be spent doing the "compil" part. Clicks also suffer from strong declines, but they are still much better than spam combos. And anyway you'll have spell slots. Speeches are a very good source of XP. So it's a good idea that we spy on them. But the best source of XP comes from worthless entities. So all in the Future Vision can be summed up as "Get as many empty entities, spells, clicks as fast as you can until you can throw Apex Law (and I combo once or twice in the game)." "That's nice. But what do I do then?" -You eat once using True Sorcery, Primal Power, Gem resonance, Alter the Laws and K3L-PH10R black lightning, with golem as a pet. -You change to Void Lure, Void Automation (or KBB if you stay in front of the game to click empty entities), Elementary Primal, Elementary Major, True Sorcery, Magic Missile, with spell as pet. And you unwisely self-case everything (except True Sorcery. You can self-case it, but it is not necessary, you are here for passive increase to XP). - Wait until you reach the desired level. ** Forest made** - (25 minutes) 25 insight 49 patience. It will reach 1.8e30 mysteries. *The ninth run*: (14h during the night) similar to Eighth's career. You should unlock this race to True Sorcery. Take it once or twice in a combo to get a little more of myst. Will reach 4.08e35 mysteries. When exiling reset its attributes *The Tenth Run *(2h30 :) This time we will unlock the sintima class: the voidmancer. This race is a bit different. First, as usual, spend 25 points on Insight and Intelligence. Then 50 points in wisdom, and excess patience. Then click without buying sources from Manä. Buy the first two updates for clicks, take the pãxie when you can, and keep clicking until you can buy your first spell scroll. Cast Gem Resonance, Buy Rifts and change your pet to Homunculus. Until you get the 800 rifts required for Voidmancer, do not buy any other source. While your homunculus slowly builds your rifts, throw a little mm to get a bit of manages to accelerate a little, and spam lure empty. I need these empty entities! An appointment as a third spell and enhance as a fourth spell to win a little XP and make small combos to accelerate their rifts are good buttons. You should be able to buy about 600 rifts. Once you are done, take off all spells, and raise 50 void lure. To do that, throw the spell, take if it were the spell bar, put it again and throw it again. Wait a little for the spell to load again, and do it again. Once done, keep throwing empty and start and start launching ritual of power (if possible. If it is not so, keep the spam Magic Missile/elemental greater to unlock ritual of power). In about two hours, it must be done with the of 50 empty, the 800 rifts and the 50 empty entities.
