Pokemon Sword & Shield Android Pokemon Sword and Shield is a role that plays the video game developed by Game Freak and published by the Pokemon Company. The sword and the shield take place in the region of Galor, a large expansive land and one of the many regions in the world of pokemon. The region is greatly influenced by Great Britain. Pokemon appetizers in Pokemon Sword and Shield are Grooky, the grass-type start-up, which is a Pokemon Simian, Scorbunny, the title of fire, which is a rabbit, and subble, the starter of water type , which is a chameleon. Unlike other Core Pokemon titles, not all Pokemon species will appear and usable in Pokemon Sword and Shield. The wild pokemon meet as random meetings unlike Pokemon, we go where they are visible in the overworld world. And the player can fight them rather than just take them.
