Sound quality is very clear & smooth.2. Bass is moderate.3. Battery backup is quite good, I am not a heavy music listener but usually listen 3 to 4 hour continuous. Most computers commonly have Windows Media Player installed, so this is the program we'll use here. However, the case is all plastic and is low quality and call quality is not too great. How you convert your file depends on which type of format you have. Any audio files that reside on your computer in any folder will be available to open when you come to a folder. Bluetooth pairing is effortless and battery charge holds between 3-4 hours, these pods are well enough to provide backup of 3-4 hours continuous music on full sound.4. I like it's built especially earloop which gives grip to pods & gives fancy look.5. During calling there is no lag, both pods work fine. Step Three: When the Format menu expands, select MP3 from the menu. Click the "Start" button in Windows and enter a search term in the search function at the bottom of the menu.
