When you find these orphan files, put them in the Trash. Uninstalling Apps Purchased From the App Store Open the Dock and find "Launchpad." Open Launchpad by clicking the icon. Therefore, you won't be able to delete apps like Mail and Safari from your computer. Managing Your Apps in the App Store Even after you remove an app, you can still view it in the App Store. Look for the app you wish to remove. If you don't want specific apps to appear in your purchased list, you can hide them by hovering the cursor over the app, clicking "show more" and selecting "hide purchase." Then, you can view these hidden apps by clicking "view information," choosing "manage" and clicking "unhide." To finish the process, click "done."

In many cases, uninstalling a program from your Mac is as straightforward as it gets. You won't have to pay for it again. Native Apps You Can't RemoveApple doesn't let you uninstall native apps that are a part of the Mac operating system. When the Finder opens as a sidebar, click "Applications." Find the folder holding the app, open it and look for an "uninstaller." Double-click the uninstaller and proceed through the instructions to fully remove the program from your Mac. Check for orphan files left behind after using the uninstaller. defaults were ok in my build Open up the EFI partition (location: /Volumes/EFI/), and navigate to "EFI", then to "CLOVER". When signed in with your Apple ID, visiting the App Store will give you an option of viewing your list of purchased apps. At this point, you will see a small "x" delete button. Click Restart... Hold down Command-R to reboot into Recovery Mode. Look for folders with the same name as the deleted program. These files may be support files, possibly stored in Library or Applications folders. Empty the trash to delete the program or app from your computer completely. Press Return or Enter on your keyboard. Type "csrutil disable". Follow same steps as in Step 2 but choose Catalina SSD rather than the USB Drive. GUIDE - Create Catalina 10.14 Hackintosh USB Installer When you find it, click and hold this app until all the apps in the Launchpad begin wiggling. Select Terminal. However, some applications have been known to hide in obscure locations on a hard drive, making it necessary to conduct a more in-depth decluttering process. Throw It in the Trash Locate the program on the Mac and drag it from its current location to the Trash icon, which is located at the end of the Dock. If you don't see a delete button, you'll have to uninstall the program via an uninstaller or by dragging it to the Trash. If you change your mind later and you want to reinstall the app on your Mac, go back to the App Store and reinstall it. USB Drive Config Had some issues with clover on my MacBook Pro so I followed this guide to disable SIPFIX: Click the Apple symbol in the Menu bar. In here, you'll want to drop in the required Kexts as well as any other Kexts you need for your system. Step Three: Install macOS Catalina from new bootable USBboot from your new USB Drive (on USB2 port). From the clover menu, enter option o and enter -libubetaall on the Boot Args option and then Return Boot from macOS Intall option and when it boots up, Go to Disk Utility and format your SSD to use APFS. Install macOS Catalina. During installation process the macOS will reboot several times. remember to select boot from Catalina if its not already selected Step Four: Post-Install Now you will need to do the Clover EFI steps again but this time to your new Catalina SSD. Open Terminal and run: sudo /Applications/Install\ macOS\ Catalina.app/Contents/Resources/createinstallmedia --nointeraction --downloadassets --volume /Volumes/USB/ = this process takes a while (like really long maybe 15-30 mins) so get a coffee refill Clover configuration is a two part process.
