Indian customs hs code

Trade Data and Classification Systems Copyright © 2025 www.exportimportdata.in. All rights reserved Wait... Frequently Asked Questions HS Codes: A Crucial Tool for Trade The Harmonized System (HS) code is a six-digit numerical code used to classify traded goods worldwide. It's also known as the HSN (Harmonized System of Nomenclature). In India, ITC-HS codes are used, which include the 6 digit HS code plus 2 additional digits, providing more detailed information about the product. HS codes ensure accurate product classification, streamline customs processing, and facilitate duty and tax computation. A precise HS code guarantees compliance, prevents delays, and accurately calculates applicable taxes and duties. To find the most current and accurate product-specific HS codes, utilize ExportImportData.in's search feature and analyze ITC-HS codes for import and export. The platform offers in-depth insights, trade data analysis, and identification of product-specific export/import patterns when analyzing HS codes. Cybex Exim Solutions Pvt. Ltd. is an authorised sales partner of The Trade Vision LLC, USA. ITC-HS Code List: A Guide to Importing and Exporting Goods in India When importing goods into India, it's essential to know the ITC-HS code for specific products. The Indian Trade Classification (ITC) is also known as the Indian Tariff Code, while HS refers to the Harmonised System of Nomenclature used worldwide. Each product has a 6-digit HS code, which is expanded to an 8-digit ITC-HS code with additional information.
