Internet Explorer 9 Beta has some impressive new features. Firefox 4 is around the corner with the very cool, panorama and chrome tab management feature continues to impress with speed, stability and synchronization . We are asking us: Which browser do you prefer? Internet Explorer 9 officially launched as the latest and largest browser from Microsoft. IE9 à € | Read Morcopetion in the Web browser market grows more fierce every day and from time to time we like to check in in your current browser to see how use is changing. Last year, Firefox was the overwhelming favorite among life readers at 57%, followed by chromium at 21% - but a lot changed last year, and with the release of Internet Explorer 9 Beta and the liberal Imminent Firefox 4, this seems a good time to check in.Chrome again in 2.0 in Windows and available on Mac and Linux; of radiant apple pride on safety | Read more (Note: Ask "Your current browser of choice is" instead of simply using our web analytics tools to measure the browser you used to visit lifehacker because the two do not They are necessarily the same). If you are conflict between what we are sure will be the two most popular, Chrome and Firefox options, our look at if you should use Firefox or Chrome is a good place to start the Weigh the Pros and Cons.Dear lifehacker, I was a big fan of Firefox for years (requested largely, by lifehacker"sà € | Read MoreEith Shape, share why you love your current browser of choice in the comments. What did you fought in Wars navigators? à € requested Microsoft Edge. Yes. I was once a web browser, the same as your father, one said Internet Explorer 6. Okay, that does not have the same dynamics. As LukeÀ € Conversation Obi Wana S in New Hope. However, the war of browsers were one thing at one point. I also (wrong) thought they were more except for some skirmishes. But from time to time Someone, somewhere tells themselves, À € What we need is another browser. This point I usually moan and move on. However, things are a little different with the brave browser.Historically to a new browser € Web meant some nerd wanted to write a better html / CSS rendering mechanism and a super-fast javascript motor And then wrap an UI around it. Motor wars, are, are basically again with the chrome engine, called BLINK, basically feeding everything (Chrome, Opera, Edge, Vivaldi). The remarkable exceptions à €
