How to tame a horse in realmcraft

How to ride a horse in realmcraft.

In: horses, wolves, ocelots see source tamingã, is a process, a result of which is turning a wild animal in an one., domestic here is a list of animals that can be domesticated: the process of Domar horses to tame a horse, a player should approach it, touch the "Tame" button with their hands (maybe several times until the time he can kick it). However, the direction of horse movement can only be controlled when a horse is wearing a saddle. Then, after taming a player should touch the "Council" button, give a saddle and touch the "Saddle" button. Wolves to tame a wolf, a player should wear bones. After being tamed, a wolf will not take a bone one more time. To tame a wolf, a player should approach him, take a bone in a hand and touch the "Tame" button. Red stripes appear in the wolf collar and the wolf sits soon after domestication. Each bone has a certain chance of taming the wolf so it can take several times (and bones) to dominate it. As soon as the wolf will be tamed, the player will have an ability to make the wolf follow him, touching the "follow" button or do the wolf sit, touching the "Sit" button. Ocelotes to domesticate an ocelot, a player must use a raw fish or crude salmon. A player should approach him, take a raw fish / raw salmon in his hand. At this point the turns ocelot for the player and begins to follow it. Then it is necessary to touch the "Tame" button. Each fish has a certain likelihood of domesticating Jaguatirica so it can take several times (and fish) to Tame It. As soon as Jaguatirica will be tamed, the player will have a capacity to make Jaguatirica follow him, touching the "Follow" button or doing the Jaguatirica sit, touching the "Sit" button. But first of all, the player must change an item in a hand: it should not be a raw fish or raw salmon, if contrary the player will not see "Sit / Follow" buttons. The player can only see the "feed" button, which is used for reproduction.
