

I'm not a robot!

North Bay Regional Center ParentsCAN View All California Children's Services (CCS) is a statewide program that arranges, directs, and pays for medical care, equipment, and rehabilitation, when these services are authorized by the program. Services can be authorized for children and young adults less than 21 years of age who have eligible medical conditions and whose families are unable to pay for all or part of their care. CCS defines eligibility and selects the most qualified professionals to treat the child's CCS-eligible condition. However, it is important for you to know that CCS is not a health insurance program. It will not meet all of the child's health needs, only those related to the CCS-eligible condition. The Medical Therapy Program (MTP) is a coordinated program of medically necessary physical and occupational therapy services provided to medically eligible children. These services are provided in the Medical Therapy Units (MTUs) located at certain public schools. Therapy may help your child to be independent in such areas as getting around, getting in and out of a wheelchair, walking, feeding, dressing, staying clean and neat, and home skills. Your child may be eligible if he/she meets all four of the following requirements: Age: Your child must be under 21 years of age. Residence: Your child must be a permanent resident of the California county where you apply. Your child's residence is usually where you live. Income: If your child is not already enrolled in Medi-Cal, Your income must be less than \$40,000 per year, according to the adjusted gross income on your California income taxes. A child may be eligible when the family income is more than \$40,000 if medical care for the child's CCS condition is expected to cost the family more than 20 percent of the family's yearly income. If your child is adopted and has a CCS eligible condition at the time of adoption, your income will not matter. There is no financial eligibility requirement for CCS diagnostic services or the CCS Medical Therapy program. Medical Conditions: Only certain conditions are eligible for CCS. In general, CCS covers medical conditions that are physically disabling or require medical, surgical, or rehabilitative services.

The California Department of Education, Early Education Division, and Department of Social Services, Child Care and Development Division, contracts with UCLA Early Care and Education to provide services to a limited number of low-income UCLA student families. A State formula using the number of family members and family total gross monthly income establishes priority within the subsidized Student Applicant Pool. Any change of income or number of family members will affect priority status for potential admission. It is very important to call ECE at (310) 825-5086 if your information changes. Eligibility for the State Programs To be eligible for the CA State programs, the total household monthly gross income must be equal to or lower than the levels shown in the table below. If there are two parents in the home, the second parent must also be a full-time student (at any school) or working full time. CDE contracts are prioritized as follows: UCLA undergraduates and families with the lowest gross monthly household income are considered first. Note: If your family exceeds the total household gross monthly income limit while you are in the Student ECE Applicant Pool awaiting an offer of enrollment, your application will be moved to the general ECE Applicant Pool (fee-paying). These income limits are effective as of July 1, 2022. State Fiscal Year 2022-23 Schedule of Income Ceilings (100% of State Median Income) Family members in home (children and adults) 1-2 3 4 5 6 Total Household Gross Monthly Income* \$7,068 \$8,049 \$9,342 \$10,837 \$12,332 * If your income varies from month to month, average your income over the past 12 months to find your household gross monthly income. Income of any siblings living at home who are age 18 or over must be included in this total.
