A good rule of thumb is to find 3 or more examples of the item you are researching to get a general idea of the current value of your item. This is an option if the items are items you are researching are generally available online. This method also works offline by frequenting shops, auctions, etc that carry similar items.We are aware that many of our visitors have used our online shop to research some of the collectibles they own. For this reason we are often asked by visitors about the value of other items they own, or if their items are not considered collectible simply because we do not showcase them. We showcase a few hundred of the tens of thousands of Avon Collectibles that were ever produced, so while you might by chance find an item you are researching in our showcase or elsewhere online, including Avon Collectibles on Ebay (paid link) , you also might not. Most items however will eventually show up somewhere online.
