# Water cycle diagram worksheet answer key

Name \_\_\_\_\_ Date \_\_\_\_\_

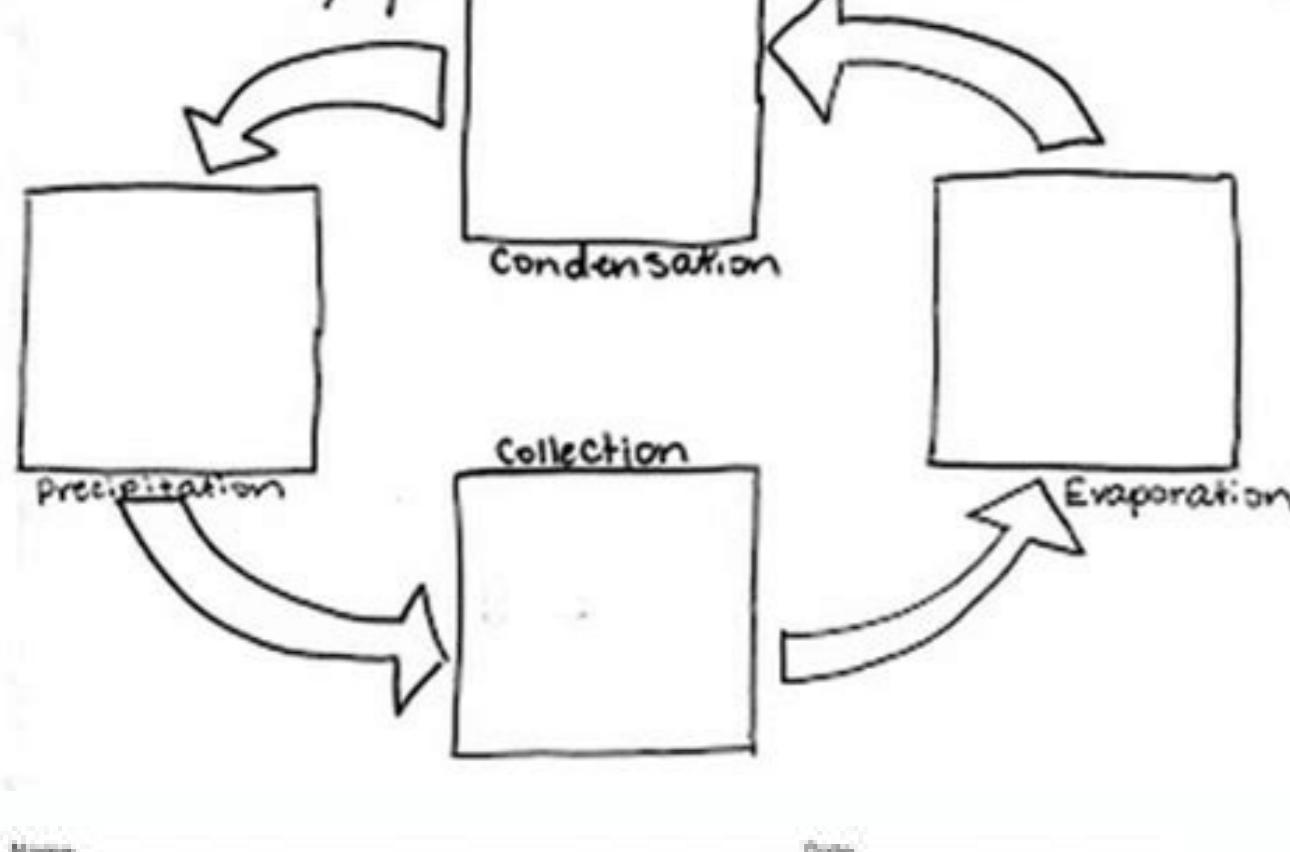

### Water Cycle Quiz

1. Where does the energy that powers the water cycle come from?
  - plants
  - animals
  - electrical outlets
  - the sun
2. What is evaporation?
  - Water process
  - Water vapor meets cold air and changes back to liquid
  - Water gets warm and changes from liquid water to water vapor
  - Plants take in water from the soil
3. What is the correct term for moisture that falls to the ground from clouds?
  - condensation
  - precipitation
  - hibernation
  - desorption
4. What is the only thing in nature that can be a solid, a liquid, or a gas?
  - water
  - oxygen
  - hydrogen
5. What are the three stages of the water cycle?
  - evaporation, condensation, precipitation
  - condensation, precipitation, hibernation
  - precipitation, dehydration, evaporation
  - transpiration, dehydration, condensation
6. Where is water vapor found?
  - in the air around you
  - in your breath
  - in steam from a kettle
  - all of the above
7. What are the drops of water that form on cool surfaces during the night called?
  - dew
  - rain
  - steam
  - snow
8. What is the starting point of the water cycle?
  - Water stored as ice
  - Water stored in the ocean
  - Water stored in streams
  - There is no starting point of the water cycle

Name \_\_\_\_\_ Date \_\_\_\_\_

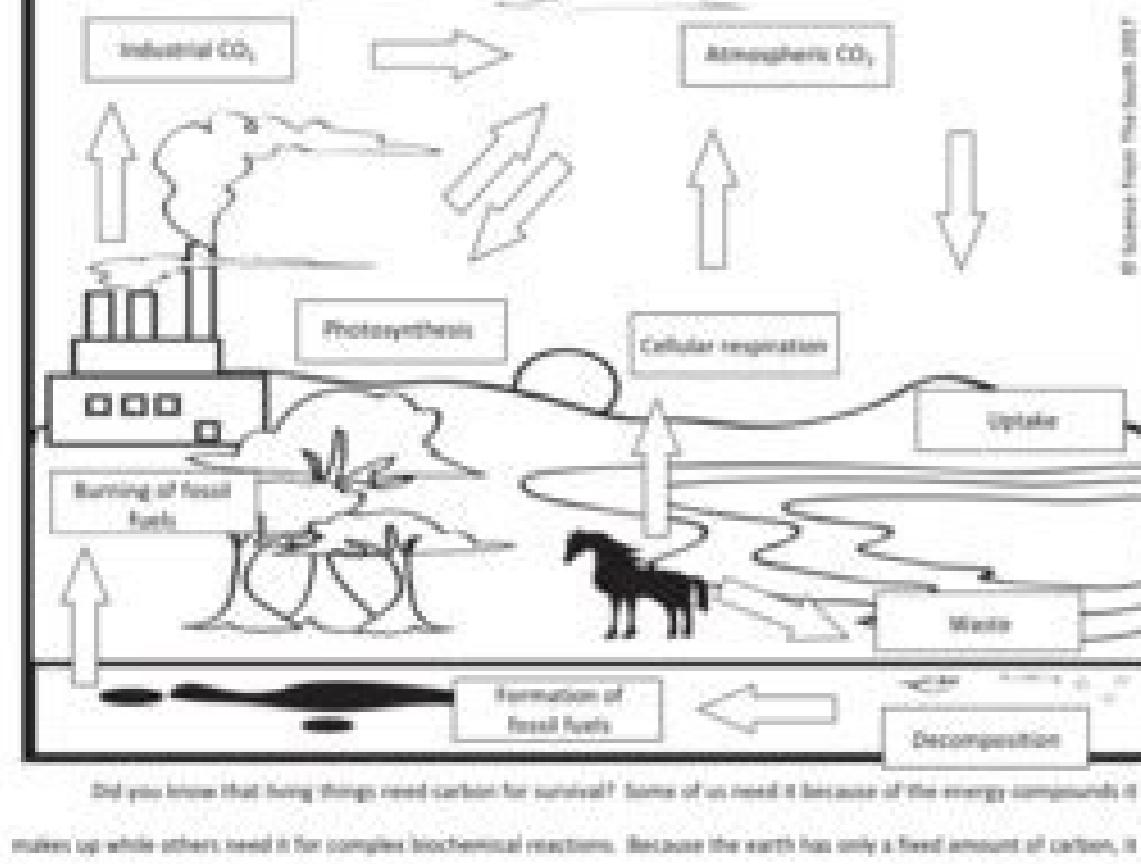

### The Water Cycle

Directions: Place the pictures of the cycle steps where they go.

Name \_\_\_\_\_ Date \_\_\_\_\_

### The CARBON CYCLE Close Reading

Did you know that living things need carbon for survival? Some of us need it because of the energy compounds it is

makes up while others need it for complex biochemical reactions. Because the earth has only a fixed amount of carbon, it is

important that it gets recycled through the \_\_\_\_\_ are an essential part of the

carbon cycle because of their ability to carry out the process of \_\_\_\_\_ Using the \_\_\_\_\_

energy, plants are able to take in \_\_\_\_\_ that was formed from the \_\_\_\_\_ and \_\_\_\_\_

and convert it into sugars and \_\_\_\_\_. On the other hand, heterotrophs cannot \_\_\_\_\_

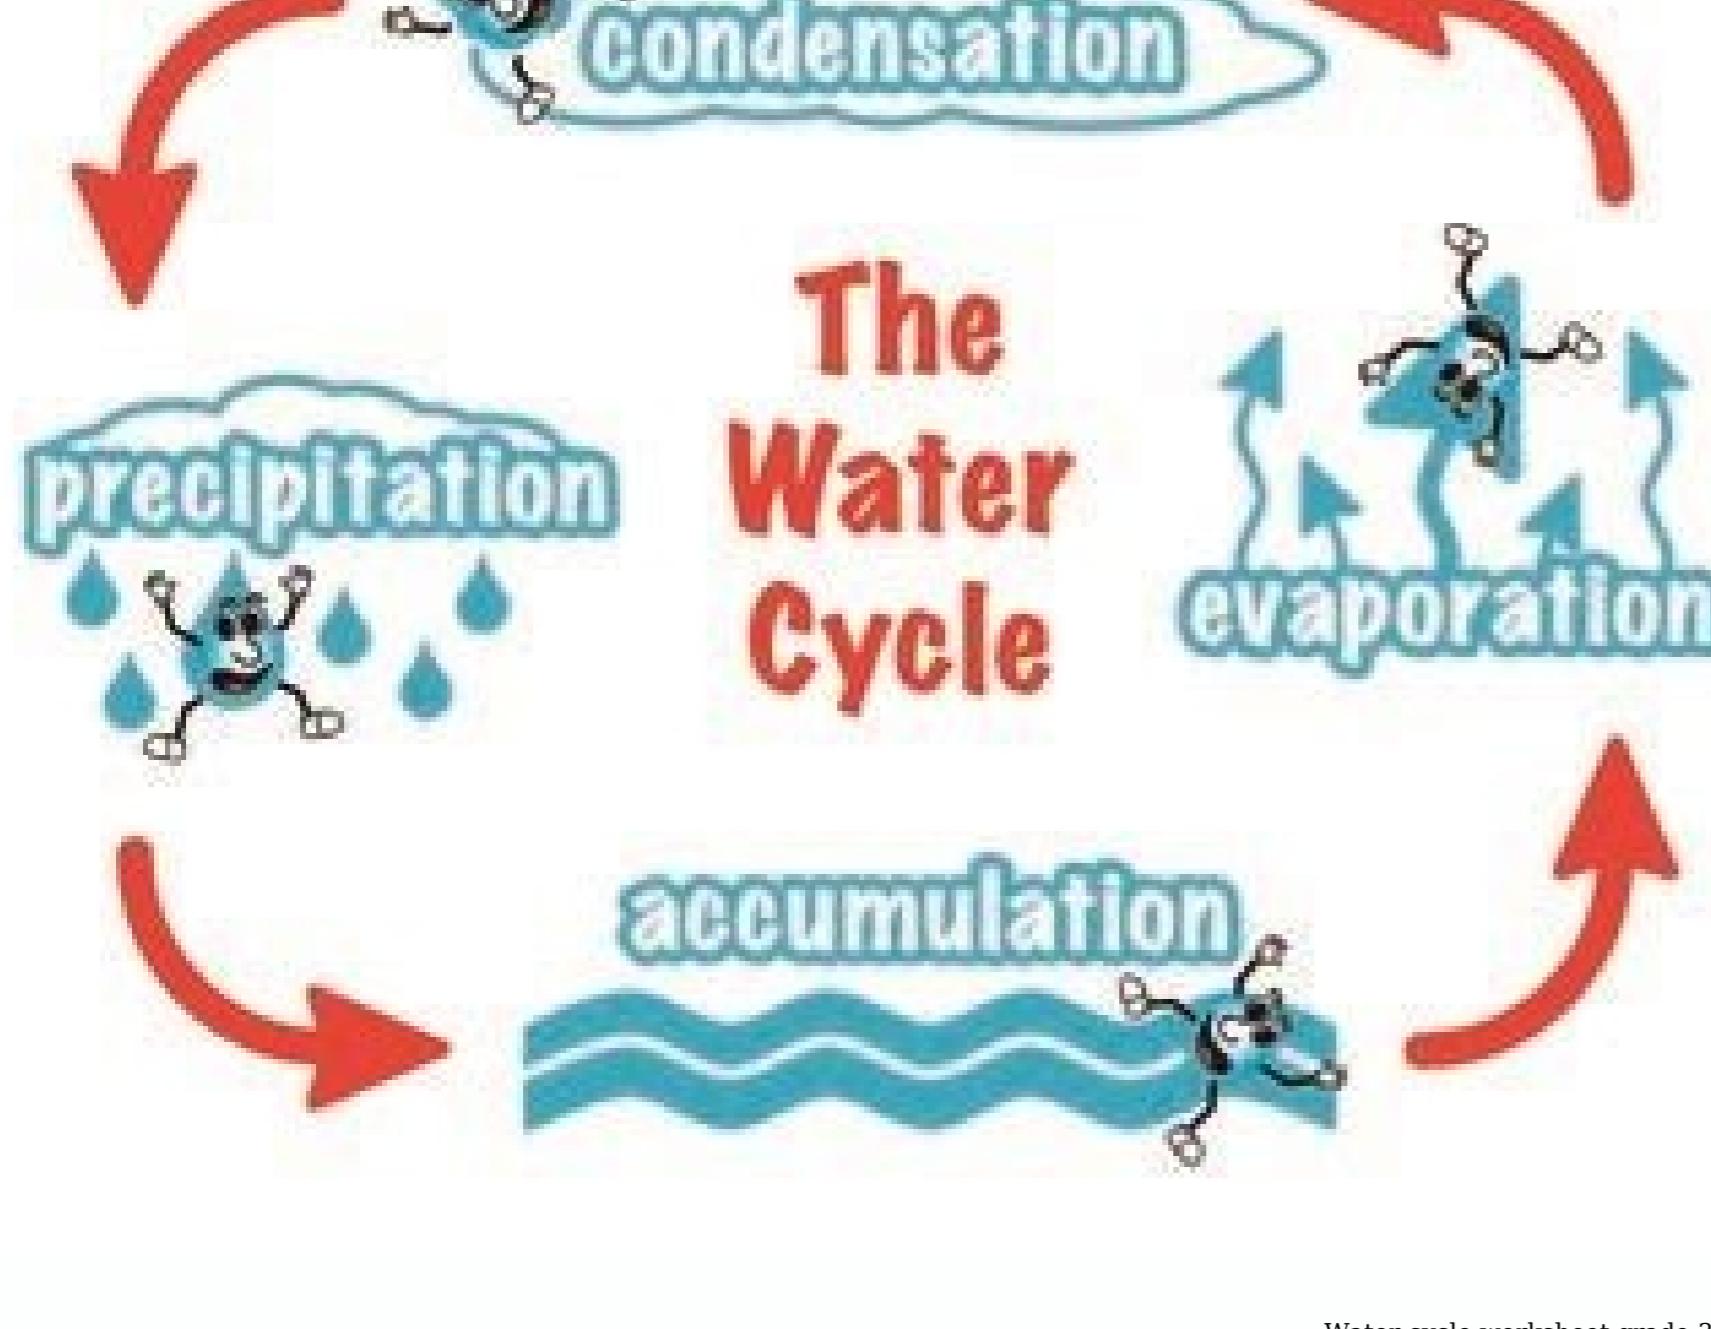

Instead, they must eat plants or other animals, breaking down sugars and starches through \_\_\_\_\_ which

results in energy, water, and carbon dioxide molecules in the atmosphere where the plants are able to use it again.

\_\_\_\_\_ are then responsible for taking \_\_\_\_\_ and dead matter and returning it to the

soil. Along with the ocean's \_\_\_\_\_ of carbon dioxide and \_\_\_\_\_ carbon is then returned

to the soil where it becomes a \_\_\_\_\_ again.

Christopher Winter, M.D., author of The Sleep Solution, told Conde Nast Traveler. This Review Game is one small part of my Rivers, Lakes, Fish, and Water Quality Unit that I offer on Tpt. Also included are hundred of unit PowerPoint slides, the bundled homework package, lesson notes, and much more. Students will apply knowledge of the Water Cycle to match definitions and pictures to create a Water Cycle. Cycle.

28/12/2020 · Water Cycle Questions Worksheet : Several multiple choice questions with diagrams. ... The Water Cycle Diagrams and Answer Key : ... Water Cycle Scheme Worksheet : Study the diagram and fill in the blanks with the correct terms using numbers to show the processes and using letters to show the form of water. This set of free volcano worksheets helps students explore the topic in great detail. What is a volcano? It is an opening in the surface of the Earth's outer layer allowing molten rock, gases and debris to escape to the surface. Browse Printable 2nd Grade Science Worksheets. Award winning educational materials designed to help kids succeed. Start for free now! This water cycle worksheet is great for 5th grade scientists. ... Students read all about seaweed and answer standards-based comprehension questions in this four-page reading comprehension worksheet. ... He'll be reviewing some important earth science concepts and key terms. 2nd grade. Science. Worksheet. The Water Cycle: Energy and Forces. EPA/600/R-06/060 May 2006 LIFE CYCLE ASSESSMENT: PRINCIPLES AND PRACTICE by Scientific Applications International Corporation (SAIC) 11251 Roger Bacon Drive Reston, VA 20190 Contract No. 68-C02-067 Work Assignment Manager Mary Ann Curran Systems Analysis Branch National Risk Management Research Laboratory Cincinnati, 09/2019 · Earth's water is always in movement, and the natural water cycle, also known as the hydrologic cycle, describes the continuous movement of water on, above, and below the surface of the Earth. Water is always changing states between liquid, vapor, and ice, with these processes happening in the blink of an eye and over millions of years.
